Beneath the Backbone of the World Ryan Hall,2020-03-19 For the better part of two centuries between 1720 and 1877 the Blackfoot Niitsitapi people controlled a vast region of what is now the U S and Canadian Great Plains As one of the most expansive and powerful Indigenous groups on the continent they dominated the northern imperial borderlands of North America The Blackfoot maintained their control even as their homeland became the site of intense competition between white fur traders frequent warfare between Indigenous nations and profound ecological transformation In an era of violent and wrenching change Blackfoot people relied on their mastery of their homelands unique geography to maintain their way of life With extensive archival research from both the United States and Canada Ryan Hall shows for the first time how the Blackfoot used their borderlands position to create one of North America s most vibrant and lasting Indigenous homelands This book sheds light on a phase of Native and settler relations that is often elided in conventional interpretations of Western history and demonstrates how the Blackfoot exercised significant power resiliency and persistence in the face of colonial change

A Hunter's Confession David Carpenter,2010-04-03 A Hunter s Confession tells the story of hunting in David Carpenter s life including the reasons he once loved it and the reasons he no longer pursues it When he was a boy Carpenter and his father and brother would head out along the side roads and into the prairie marshlands searching for duck grouse and partridge As a young man he began skulking around the bushes with his hunting buddies and trudging through groves of larch alpine fir and willow in search of

elk Later hunting became a form of therapy a way to ward off melancholy and depression In the end as a result of a dramatic experience after shooting a grouse Carpenter gave up hunting for good Winding through this personal narrative is Carpenter's exploration of the history of hunting subsistence hunting versus hunting for sport trophy hunting and the meaning of the hunt for those who have written about it most eloquently Are wild creatures somehow our property How is the sport hunter different from the hunter who must kill game to survive Is there some sort of bridge that might connect aboriginal hunters to non aboriginal hunters Why do many hunters feel most fully alive when they

Medicine that Walks Maureen K. Lux, 2001-12-15 In this seminal work Maureen Lux takes issue with the biological invasion theory of the impact of disease on Plains Aboriginal people She challenges the view that Aboriginal medicine was helpless to deal with the diseases brought by European newcomers and that Aboriginal people therefore surrendered their spirituality to Christianity Biological invasion Lux argues was accompanied by military cultural and economic invasions which combined with the loss of the bison herds and forced settlement on reserves led to population decline The diseases killing the Plains people were not contagious epidemics but the grinding diseases of poverty malnutrition and overcrowding Medicine That Walks provides a grim social history of medicine over the turn of the century It traces the relationship between the ill and the well from the 1880s when Aboriginal people were perceived as a vanishing race doomed to extinction to the 1940s when they came to be seen as a disease menace to the Canadian public Drawing on archival material ethnography archaeology epidemiology ethnobotany and oral histories Lux describes how bureaucrats missionaries and particularly physicians explained the high death rates and continued ill health of the Plains people in the quasi scientific language of racial evolution that inferred the survival of the fittest The Plains people's poverty and ill health were seen as both an inevitable stage in the struggle for civilization and as further evidence that assimilation was the only path to good health The people lived and coped with a cruel set of

circumstances but they survived in large part because they consistently demanded a role in their own health and recovery
