American Buffalo In Transition:

The American Buffalo in Transition: a Historical and Economic Survey of the Bison in America, by J. Albert Rorabacher J. Albert Rorabacher, 1971 The American Buffalo in Transition J. Albert Rorabacher, 1971 **Imagination in Transition**

Bruce Barton, 2005 The move from playwright to cinema screenwriter and director is a rare accomplishment No American writer has achieved this transition with the level of success enjoyed over the past two decades by David Mamet Over this same period Mamet has also authored a body of aggressive critical writing that demonstrates enduring aesthetic and ideological preoccupations regularly expressed as a set of confident best practices However the relationship between theory and practice becomes particularly and productively rowdy at the sites of Mamet's transitional media crossing Imagination in Transition establishes a flexible set of core characteristics of Mamet's dramatic and theatrical dramaturgy and then compares these with the textual and cinematographic strategies employed by Mamet in his initial transitional feature films This study then offers both an innovative approach to Mamet's work and an illuminating framework for cross media analysis

Wildlife Production Systems Robert J. Hudson, K. R. Drew, L. M. Baskin, 1989-06 This book first published in 1989 examines the controversial position of commercial utilisation in relation to wildlife conservation Production of large mammals has earned respectability as an agricultural strategy and its evaluation has been listed as a priority requirement in the World Conservation Strategy However many authorities question whether wildlife production is a viable economic and environmental strategy and suggest that it runs counter to its claimed purpose This book evaluates this controversy by chronicling the changing role of wildlife and by reflecting on the implications of these trends The book should be of interest to people both applauding and deploring the use of wildlife in this economic role **Agrarian Landscapes in Transition**

Charles Redman, David R. Foster, 2008-07-18 Agrarian Landscapes in Transition researches human interaction with the earth With hundreds of acres of agricultural land going out of production every day the introduction spread and abandonment of agriculture represents the most pervasive alteration of the Earth's environment for several thousand years What happens when humans impose their spatial and temporal signatures on ecological regimes and how does this manipulation affect the earth and nature's desire for equilibrium Studies were conducted at six Long Term Ecological Research sites within the US including New England the Appalachian Mountains Colorado Michigan Kansas and Arizona While each site has its own unique agricultural history patterns emerge that help make sense of how our actions have affected the earth and how the earth pushes back The book addresses how human activities influence the spatial and temporal structures of agrarian landscapes and how this varies over time and across biogeographic regions It also looks at the ecological and environmental consequences of the resulting structural changes the human responses to these changes and how these responses drive further changes in agrarian landscapes The time frames studied include the ecology of the earth before human interaction pre European human interaction during the rise and fall of agricultural land use and finally the biological and cultural

response to the abandonment of farming due to complete abandonment or a land use change such as urbanization The Osage Willard H. Rollings,1995 The Osage Indians were a powerful group of Native Americans who lived along the prairies and plains of present day Kansas Missouri Oklahoma and Arkansas The Osage An Ethnohistorical Study of Hegemony on the Prairie Plains now available in paper shows how the Osage formed and maintained political economic and social control over a large portion of the central United States for more than 150 years Bison Desmond Morris,2015-05-15 Stoic regal and formidable in size and strength the bison has long epitomized the American West Perhaps this is even more so because we have in our avarice nearly destroyed them all and are now seeking to restore their populations From spiritual figure to abused resource to powerful symbol of wildlife preservation the bison is a microcosm of the West itself and in this book renowned zoologist Desmond Morris tells its fascinating story from the first evidence of its fossil record two million years ago all the way up to today Exploring the bison s evolution and habitat Morris paints a nuanced portrait of this iconic animal exploring the different sides of its personality He shows that while generally seen as gentle and calm bison in fact are very unpredictable liable to attack at any moment Comparing and contrasting the two remaining species the European wisent and the American bison he goes on to tell the heartbreaking story of their near extinction how we hunted them down from innumerable numbers to less than a thousand with such little regard that it was a common practice for train travelers to shoot them from their passing cars He also tells the story of our more recent efforts and successes at bringing them back to such a point that their domestically raised meat has now become a popular alternative to beef Throughout Morris balances this natural history with a cultural one the lore of the bison and the spirit of the west dotting his text with vibrant images of the bison from nature art and popular culture The result is an absorbing history of one of the most majestic creatures to walk the plains of the earth **What Is Extinction?** Joshua Schuster,2023-02-21 WINNER 25th ANNUAL SUSANNE M GLASSCOCK BOOK PRIZE Life on Earth is facing a mass extinction event of our own making Human activity is changing the biology and the meaning of extinction What Is Extinction examines several key moments that have come to define the terms of extinction over the past two centuries exploring instances of animal and human finitude and the cultural forms used to document and interpret these events Offering a critical theory for the critically endangered Joshua Schuster proposes that different discourses of limits and lastness appear in specific extinction events over time as a response to changing attitudes toward species frailty Understanding these extinction events also involves examining what happens when the conceptual and cultural forms used to account for species finitude are pressed to their limits as well Schuster provides close readings of several case studies of extinction that bring together environmental humanities and multispecies methods with media specific analyses at the terminus of life What Is Extinction delves into the development of last animal photography the anthropological and psychoanalytic fascination with human origins and ends the invention of new literary genres of last fictions the rise of new extreme biopolitics in the Third Reich that attempted to change the meaning of extinction and the
