

THE HISTORY OF SCOTTISH EDUCATION

Volume I – From the Beginnings to 1872

Volume II – From 1872 to the Present Day

James Scotland

(University of London Press Ltd., 1969/70)

JAMES CRAIGIE, *formerly Senior English Master, Musselburgh Grammar School*

The first attempt at writing a history of Scottish education seems to have been the short work of 24 pages by David Middleton, one of Her Majesty's Inspectors of Schools in the third quarter of last century. It was entitled *A Glance at the History of Scottish Education* and was published at Edinburgh in 1860. Since then at least another fourteen works on the same subject have appeared, the latest of them being the two-volume *History of Scottish Education* by the Principal of Aberdeen College of Education. Some of its predecessors were, like Middleton's work, no more than pamphlets; others, however, were substantial works, though Dr John Kerr's *Scottish Education* was the only one of them to achieve a second edition, and that was more than half a century ago. None of these earlier works, however, covers so wide a field as do Mr Scotland's two volumes, and none of them, except perhaps James Grant's *Burgh Schools of Scotland*, deals with its subject in such detail. Grant indeed is fuller on his chosen subject than is Mr Scotland on any one of the aspects of Scottish education with which he deals, but Grant wrote on a limited topic on a very large scale and that is why his book has not yet been superseded in its particular field.

Mr Scotland's first volume is much longer than his second one. This is not wholly because it covers a much longer period, since by the middle of it he has reached the year 1803, so that its remaining 190 pages are devoted to the story of the next sixty-nine years. The main reason is that before the Act of 1872 created a unified and uniform system of education directed and largely controlled from the centre there were many separate interests all of which call for separate study. At the same time it may seem strange that the history of the first thousand years of Scottish education can be told in 180 pages, as is done here. The reason is that hardly any of the materials on which a detailed study could be based now exist. To add 'if they ever existed' is to ignore such documents as *Reports on the State of Certain Parishes in Scotland* drawn up in 1627, or the *Register containing the State of every Burgh within the Kingdom of Scotland* which belongs to the year 1692. Both of these contain information about educational matters preserved nowhere else, though Mr Scotland does not seem to have consulted them. Their existence leads one to wonder how many others have perished and what might have been learned from them. If the original records of the General Assembly of the Church of Scotland for the years before 1638 disappeared so long ago that their contents are now known only from transcripts made in the early seventeenth century, then it is clear that less important documents could easily vanish without trace.

The amplitude of the text and the care taken to document the narrative show Mr Scotland's researches to have been both wider and deeper than those of any of his predecessors. He has not been content to confine himself to the obvious sources such as the Minutes and Circulars of the *Committee of*
