Architect in the Gilded Age Bill Ranauro, 2023-07-07 The late nineteenth century known commonly as the Gilded Age produced some of the most beautiful yet controversial architecture in America's history The great influencers of the period including Richard Upjohn Henry Hobson Richardson and Charles McKim each spread the gospel of his own architectural style The result was an eclectic mix of styles that some detested but that others embraced Caught in the struggle to find an architecture America could claim as its own Hartford Connecticut architect William Brocklesby carved out his own stylistic path In an age when the taste for ostentation and pretension was adopted by many William Brocklesby produced some of the most dignified and beautiful architecture in the Connecticut Valley His churches libraries and theaters remain as artistic landmarks throughout western New England and his work at colleges from Hartford to Amherst Massachusetts make for some of the most picturesque college campuses in America This book serves as a companion to the author's earlier book *Asher Benjamin American Architect* Author Artist Taken together the two books provide a view of developments in American architecture from 1790 to 1910 **The Architecture of William C Brocklesby** Hailing from Hartford Connecticut architect William C Brocklesby 1847 1910 spent his career designing beautiful yet dignified churches libraries and public buildings throughout the Connecticut River Valley and western New England Working in an age when ostentation was the rule rather than the exception Brocklesby maintained a restrained hand in the application of ornament His design of Forbes Library in Northampton Massachusetts stands out as a monument to his ability as a design architect In addition William Brocklesby was

among a handful of nineteenth century architects who made the Connecticut River Valley the birthplace of the prototypical American college campus Working largely within the vision of the famed American landscape architects Andrew Jackson Downing and Frederick Law Olmstead Brocklesby and others built campuses that were meant to mimic the traditional New England village Through the designs of the college buildings by Peabody and Stearns and William Brocklesby Smith College s architectural history traces the development of late nineteenth century styles National Register of Historic Places Inventory

Stamper, 2024-04-01 City and Campus tells the rich history of a Midwest industrial town and its two academic institutions through the buildings that helped bring these places to life John W Stamper paints a narrative portrait of South Bend and the campuses of the University of Notre Dame and Saint Mary s College from their founding and earliest settlement in the 1830s through the boom of the Roaring Twenties Industrialist giants such as the Studebaker Brothers Manufacturing Company and Oliver Chilled Plow Works invested their wealth into creating some of the city s most important and historically significant buildings Famous architects including Frank Lloyd Wright brought the latest trends in architecture to the heart of South Bend Stamper also illuminates how Notre Dame s founder and long time president Father Edward Sorin C S C recruited other successful architects to craft in stone the foundations of the university and the college at the same time as he built the scholarship City and Campus provides an engaging and definitive history of how this urban and academic environment emerged on the shores of the St Joseph River
