Crazy Rob Dobrenski, 2012-08-07 An average day in the life of a psychologist can be a frenetic one A 9 a m appointment to help a woman manage a husband who won t take out the garbage quickly shifts to a session with a convicted rapist at 10 a m After talking with a child an hour later about his fears of school the psychologist meets his therapist to deal with his own fears followed by lunch with a socially phobic colleague who s already had four martinis by 1 p m And it s only Monday At turns hilarious and heartbreaking thoughtful and irreverent Crazy is the incredibly honest and insightful story of how one mental health professional deals with his own personal problems and those of the people he treats Part expos part memoir it reveals what therapists really think about their profession their colleagues their patients and their own lives **The Diary**

of a Mad Chef Daniel Dellavecchia, 2012-07 This family cookbook morphed into much more for me during the writing process It began by contacting friends and family to collect recipes for what I thought would be a simple process During those conversations and with my own memories a flood of personal history evolved in my mind What began as a repository of food recipes became much more to me and I decided to collect the process in the form of this book The Diary of a Mad Chef to also include photos of those people and selected short stories Food has always been the center of our family s common narrative thread and I attempted to place the face and the stories of my friends and family with the recipes as I remember them Along with the feedback and photos from my friends and family it became a two year long effort to compile edit and publish this book The journey has been a magnificent experience for me and I am grateful to have had the time and opportunity to write this book The New Children and Near-Death Experiences P. M. H. Atwater, 2003-11-06 Presents an

in depth look at children who have experienced the near death phenomenon and the heightened abilities that these children exhibit Provides compelling evidence for the existence of a generation of children who represent the spiritual evolution of the human race Includes firsthand testimonies of children who have returned from near death The New Children and Near Death Experiences is the first book to provide from the view of the child an in depth study of children who have experienced the near death phenomenon and its aftereffects Atwater notes that the child who returns from a near death experience is not the same child as before but is a remodeled rewired reconfigured refined version of the original Presenting data to support her contention that these children have experienced structural chemical and functional changes in the brain she also shows how their greater empathic abilities as well as dramatically higher intelligence are qualities that are also present in children born since 1982 enhanced abilities that cannot be tied to simple genetics Atwater shows that understanding the near death experiences of children can help us prepare for a quantum leap in the evolution of humanity *Crazy Lady* James

Goldstein,2013-09-20 Donna M Goldstein presents a hard hitting critique of urban poverty and violence and challenges much of what we think we know about the culture of poverty in this compelling read Drawing on more than a decade of experience in Brazil Goldstein provides an intimate portrait of everyday life among the women of the favelas or urban shantytowns in Rio de Janeiro who cope with unbearable suffering violence and social abandonment The book offers a clear eyed view of socially conditioned misery while focusing on the creative responses absurdist and black humor that people generate amid daily conditions of humiliation anger and despair Goldstein helps us to understand that such joking and laughter is part of an emotional aesthetic that defines the sense of frustration and anomie endemic to the political and economic desperation among residents of the shantytown
