new 500 telescope scope set it up and soon you're in business. Unfortunately the high initial expectations usually give way to disappointment. Instead of seeing the magnificent swirling clouds of gas in the Orion Nebula you see a pale green-gray cloud with a couple of nondescript stars lurking nearby. The swirling red, yellow, and brown storms of Jupiter are nowhere to be seen; only varying shades of gray in the planet's cloud bands, assuming you can see bands at all. And Mars? After waiting all night for the red planet to rise up over the morning horizon you are greeted by nothing more than a featureless reddish-orange dot.
