Marine Aquariums Ray Hunziker, 2005-09-01 Author Ray Hunziker, longtime editor of *Tropical Fish Hobbyist* magazine and lifelong fish keeper, is the ideal tutor for aquarists looking to take a dive into the saltwater end of the tank. *Marine Aquariums* begins with a discussion of seawater and water quality, the most critical part of keeping marine fishes happily swimming and breathing in their tank. Hunziker continues with a step-by-step explanation of setting up a marine aquarium, discussing aquarium types, the number of fishes for the size tank selected, siting the tank, stands, substrates, temperature, lighting, filtration, and décor. The chapter on stocking and maintaining the tank discusses purchasing healthy, vibrant fish, acclimatizing them to the tank, feeding them, and monitoring the tank on a regular basis. An elaborate chapter on the various types of saltwater fishes available, *Ideal Fish for Your Marine Aquarium*, details and illustrates nearly 70 fishes, divided into the following categories: moray eels, squirrelfish, and soldierfish; lionfish, groupers, cardinalfish, butterflyfish, angelfish, damselfish, hawkfish, wrasses, jawfish, gobies, surgeonfish, and triggerfish. The final chapter discusses keeping fish healthy, including the signs of illness, treating various ailments, and setting up a quarantine tank for affected fish. Resources, glossary, index included.
