Coworking Spaces Ideas:

Coworking Spaces Janet Merkel, Dimitris Pettas, Vasilis Avdikos, 2023-11-07 This contributed volume considers the emergence of coworking as centered in labor issues. More specifically its chapters consider it as a coping mechanism in the worldwide rise of independent modes of work i.e. self employment that leaves more and more workers exposed to precarity as they must organize and manage their own labor. Grounded in this perspective this volume aims to understand the transformative social and political potentials emerging through coworking as a social and spatial practice. There is a distinct lack of discussion within coworking research on the emancipatory potentials of coworking and if it is discussed more cautionary views prevail highlighting the ambivalence of coworking spaces both as a space of alternative economic practices and as integrated into market economies. The aims of this collection are twofold. First it aims to make visible the plurality of existing practices around shared resources in coworking and the assemblages of human and non human actors as agents of change associated with coworking and the re organization of work and labor power. And second it aims to develop a more emancipatory narrative for coworking and the role of coworking spaces for workers but also the different spatial contexts in which these spaces are situated. A narrative that does not emphasize entrepreneurship or coworking as the epitome of the neoliberal entrepreneurial self as in the dominant interpretations in the current research but rather one that centers coworking in the creation of meaningful careful social relationships supporting empathy and an ethics that recognizes mutual interdependencies and builds a foundation for social change. So it is about alternative narratives emancipation politics and the wider social role that coworking spaces might play in neighborhoods cities or beyond because they are crucial contexts for the formation and maintenance of social relations. With this specific direction this collection aims to bring coworking research into a fruitful dialog with other research fields such as sociology of work feminist perspectives on care alternative and diverse economies post capitalist transformation critical geography positioning coworking within a range of progressive alternatives in the articulation of economic and social relationships.

Sustainability of Young Companies-Contemporary Trends and Challenges Marek Jabłoński,2019-07-11 Ensuring the sustainability of early stage companies and increasing awareness of the need for balancing targets against different stakeholder groups among young companies are not well developed Young companies in the first place want to achieve financial success very often without regard for aspects such as the environment positive relationships with employees suppliers or other stakeholder groups fulfilling requirements of labor law etc Another issue is that of companies whose business models are based on actuarially preferred concepts such as sharing economy sustainable development e-commerce e-commerce renewable energy social media and others A key issue is the resignation of companies from an approach to business based on the foundations of classical economics to the sharing economy Theory and practice seek new solutions in the sphere of value sharing in these new areas of sharing and innovative forms of its implementation Intriguing is the relationship of these business models with sustainability issues as well as wondering how technology can influence sustainability A contemporary approach to consumer value fits in with the assumption of a shared economy It is interesting how it affects the assumptions of sustainability of business The ongoing changes in the value system of potential consumers create new conditions for the design of sustainability business models and creation of innovation

Plug&Play Places Robert Nadler, 2014-10-08 In post industrial societies more and more people earn an income in creative knowledge work a highly flexible labour market segment that demands a geographically mobile workforce Creative knowledge work is based on an understanding of language culture and symbolic meanings This can best be obtained through local and national embeddedness Yet this necessity for embeddedness stands in contrast to the demand in geographical mobility How is this contradiction solved by individuals What new forms of place attachment does this bring about This book introduces a showcase of 25 multilocal creative knowledge workers who live in different countries at the same time It investigates how continuous mobility becomes part of their lifeworld and how it changes their feelings of belonging and practices of place attachment Applying an innovative methodological mix of social phenomenology hermeneutics and mental mapping this book takes a detailed look at biographies and the role of places in mobile lifeworlds Plug Play Places brings forth the idea that places have to be understood as individual items which are configured and then plugged into the system of the own lifeworld They can be played without great effort once an individual needs to make use of them This new type of place attachment is a form of subjective standardization of place which complements the well known
