An Outline Of Educational Psychology:

An Outline of Educational Psychology Arthur A. Attwell, 1973 Styles of Learning and Teaching Noel J. Entwistle, 2013-10-31 First Published in 1989 This book is in a sense a text book of educational psychology designed mainly for those with little previous knowledge of the subject But it is not a conventional text book To begin with it does not cover the whole area which normally defines educational psychology It concentrates instead on those aspects which are most directly applicable to understanding the processes related to learning intellectual skills and acquiring knowledge Also the book does not aim to provide a detailed coverage it is deliberately selective in the topics which are covered The main aim is to present an outline or perhaps an overview of current ideas in educational psychology in the hope of providing a more coherent picture of what otherwise tends to be a rather fragmentary set of topics drawn from mainstream psychology Read in conjunction with more conventional textbooks this overview should provide a good guide to the recent literature Styles of Learning and Teaching Noel James Entwistle, 1981 *The Outlines of Educational Psychology* William Henry Pyle, 1911

The Outlines of Educational Psychology William Henry Pyle, 2015-06-16 Excerpt from *The Outlines of Educational Psychology* An Introduction to the Science of Education The fact that we have had no general text book in educational psychology has led to the preparation of this book which is the outgrowth of the work with my own classes I have endeavored to select for treatment those facts and principles of psychology fairly well established that have evident and direct bearing upon the problems of teaching The time is at hand when every step in educational procedure must have scientific justification This can come in the main from only one source the crucial test of experimental determination If this volume contributes in some small measure toward the end of making education more scientific I shall feel that its publication will be justified It has been my aim to be careful and conservative to keep within the warrant of established fact However I realize that nearly every page shows the need of more facts more data Experimental psychology is a thing of only yesterday educational psychology is a new born infant of today But it is an infant of great promise The army of trained investigators that is attacking the myriad problems of the school will give us even in a decade results of great importance to education But the work must be carefully done It is my belief that a text book should be a mere outline to be elaborated by teacher and students The questions and exercises and the references will help toward this elaboration About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **An Outline of Educational Psychology** Rudolf Pintner, 1949 An Outline of Educational Psychology , 1944 An Outline of Educational Psychology
