

TEST AND MEASUREMENT IN SPORTS

CHAPTER-7

TEST

A test is a tool which is used to evaluate the skills, performance and reliability of the task completed by a sports person.

MEASUREMENT-

Measurement is about the collection of data about performance or task completed by a sports person by using a test.

Evaluation: It is a systematic determination of a subject's merit, worth and significance, using criteria governed by a set of standards.

IMPORTANCE OF TEST AND MEASUREMENT -

1. To frame the objectives.
2. To evaluate the learners.
3. To evaluate the teaching programme.
4. To know the capacities and abilities.
5. To discover the needs of the participants.

BODY MASS INDEX (B.M.I.)-

It is the value derived from the mass (weight) and height of an individual.

FORMULA FOR CALCULATING B.M.I. -

$$\text{Body Mass Index} = \frac{\text{Weight in Kg}}{\text{Height in m}^2}$$

WAIST HIP RATIO-

Waist Hip Ratio is the ratio of the circumferences of waist to that of the hips.

FORMULA FOR CALCULATING WAIST HIP RATIO-

$$\text{Waist hip ratio} = \frac{\text{Waist Circumference}}{\text{Hip Circumference}}$$

An Introduction To The Evaluation Of Measurement Data In Physical Education

Michael Brown

An Introduction To The Evaluation Of Measurement Data In Physical Education:

An Introduction to the Evaluation of Measurement Data in Physical Education John Alexander Allen, 1971 **An Introduction to the Evaluation of Measurement Data in Physical Education** Thomas J. Sheehan, 1971 Mathematik Test Statistik *Measurement and Evaluation in Physical Education and Exercise Science* Skip M. Williams, Alan C. Lacy, 2018-02-13

The eighth edition of *Measurement and Evaluation in Physical Education and Exercise Science* now published in paperback and hardback offers students a clear and practical guide to best practice for measurement and evaluation in school and nonschool based physical activity programs. Written by two academics with backgrounds in physical education teacher education (PETE), the book emphasizes the link between theory and practice and reflects the most recent changes in national physical education programs. It covers a full range of introductory topics including current trends in measurement and evaluation, program development, statistics, test selection, and an expanded chapter on alternative assessment. Before introducing measurement for health-related physical fitness, measurement for psychomotor skills, measurement for cognitive knowledge, measurement for affective behaviors, grading, self-evaluation. Each chapter features learning aids such as objectives, key terms, practical applications, and review questions, while an appendix offers in-depth Excel assignments. Offering a full companion website featuring an instructor's manual, lecture slides, and a test bank, *Measurement and Evaluation in Physical Education and Exercise Science* is a complete resource for instructors and students alike. It is an essential text for students in measurement and evaluation classes as part of a degree program in physical education, exercise science, or kinesiology, and a valuable reference for practitioners seeking to inform their professional practice.

The Scientific View of Sport O. Grupe, D. Kurz, M. Teipel, 2012-12-06

Progress and happiness, however, these terms may be understood in detail as a significant and constitutive element of scientific inquiry. In this sense, the question of the way in which sport really benefits people and contributes to their happiness and under which individual and social conditions is a scientific question. It assumes special significance when the fact is taken into account that in the field of sport science, a general scepticism is shown towards those dogmas and pedagogical theses which take such an interpretation for granted in the absence of a firm empirical foundation and a critically evolved theory. Sport and Sport Science: Sport and exercise, physical culture and education in sport, physical training, gymnastics and touring combined with some form of sport are, as the present report distinctly shows, all over the world among the most striking social phenomena of today. At first sight, they seem to be uncomplicated, clear and comprehensible for everybody; they stand for a type of solidarity which is independent of differences in ideological, political outlook and sometimes exhibit an almost archaic intensity and attraction. They are supported by the active participation or at least the interest of very many people in many parts of the world and are endowed with specific functions varying in importance: of a medical, therapeutical, prophylactic, rehabilitative, pedagogical, psychological and social character.
