An Authors Guide To Social Work Journals:

An Author's Guide to Social Work Journals Henry N. Mendelsohn, 1987 **Social Work At The Millennium** Robert Morris, 2007-09-12 For the last century social workers have attended to those in need and sought to improve the social and economic conditions of the disadvantaged At the dawn of a new century the country's leading social work practitioners and educators have come together in one stellar volume to assess the successes and failures of the field in its first hundred years They lay out the road social work must take to face the challenges ahead Along with two chapters by the editors June Gary Hopps and Robert Morris *Social Work at the Millennium* includes ten chapters from an exceptionally strong group of contributors offering a range of interpretations of the future of social work By looking with a critical eye at the past century and at the present day the authors come to varying conclusions that will stir debate within the field for years to come But all agree that social workers need a place at the policy drafting tables as well as in the human services triage rooms and that much work needs to be done to ensure that this happens *Social Work at the Millennium* presents the top voices of the social work field as they begin to craft the future of the profession and issues a challenge to social workers students scholars and policy makers to continue the discussion to shape a better future for the profession and the people it serves ***The Handbook of Social Work Research Methods*** Bruce Thyer, 2001 This volume is the definitive resource for anyone doing research in social work It details both quantitative and qualitative methods and data collection as well as suggesting the methods appropriate to particular types of studies It also covers issues such as ethics gender and ethnicity and offers advice on how to write up and present your research **Handbook for Academic Authors** Beth Luey, 2002-06-10 In this fourth edition Beth Luey offers up to date advice to academic authors **Journals of the Century** Tony Stankus, 2019-12-06 This book first published in 2002 gathers some of America's top subject expert librarians to determine the most influential journals in their respective fields 32 contributing authors reviewed journals from over twenty countries that have successfully shaped the evolution of their individual specialties worldwide Their choices reflect the history of each discipline or profession taking into account rivalries between universities professional societies for profit and not for profit publishers and even nation states and international ideologies in each journal's quest for reputational dominance Each journal was judged using criteria such as longevity of publication foresight in carving out its niche ability to attract none are in the employ of any publisher but each is fully credentialed and well published and many are award winners The authors guide college and professional school librarians on limited budgets via an exposition of their analytical and critical winnowing process in determining the classic resources for their faculty students and working professional clientele **Bibliometrics in Social Work** Gary Holden, Gary Rosenberg, Kathleen Barker, 2013-01-11 *Bibliometrics in Social Work* examines the cross disciplinary field of bibliometrics including the multiple techniques and applications that have been described in the scholarly literature Moving beyond this general overview the authors examine applications of bibliometrics in social work Subsequent

chapters detail how the technique can be used to demonstrate the eventual impact on the field of publications in selected journals. These analyses are conducted using the bibliometric technique referred to as citation analysis. The authors then move on to present what will be a controversial proposal to some in the field using bibliometrics techniques in making academic personnel decisions. The authors propose that hiring, retention, tenure, and promotion decisions could be made more uniform and fair by using citation analysis. A series of experts in bibliometric analyses then critically respond to these initial chapters. The authors conclude by weaving their responses to these commentators with new scholarship on bibliometrics that has recently appeared. This unique book is a valuable aid for social work scholars. Drawing on broad interdisciplinary streams of scholarship from around the world, the collection illuminates a field that is not well known to social workers. While cautiously advocating for a number of applications of the technique, the authors balance this position by presenting a comprehensive summary of the criticisms of the technique and by the inclusion of a series of critical commentaries by the leading experts on these issues in the field of social work.

Bibliometrics in Social Work both summarizes what we know and pushes the field to think about how social work professionals can use this approach to improve our scholarship and the evaluation of scholars. *Bibliometrics in Social Work* addresses theoretical and methodological issues, pros and cons from the view of numerous bibliometric scholars, bibliometrics outside of social work, applications within social work previously reported in the literature, estimates that have been reported in the literature of how much social workers publish and how much impact those publications have had, how citation analysis can be used to analyze a selection of publications in a single journal and their subsequent impact, how citation analysis might be used to improve academic employment decisions, concerns regarding self-citation and multiple authorship, measurement issues in bibliometrics (e.g., age adjustments, concentration, citedness and uncitedness, the Price Index, lag times, persistence, synchronous and diachronous self-citations, the Multiple Author Qualifier).

Bibliometrics in Social Work critically examines these methods and their applications in social work. The book will be an enlightening read for social work scholars and those academic administrators involved in the evaluation of social work scholars as well as academic librarians that support social work programs.

Research Methods for Generalist Social Work Christine R. Marlow, 2023-02-28. Social work professionals must have a deep understanding of research methods to effectively serve their clients and communities. In this comprehensive guide, Christine Marlow emphasizes this link between research and practice. She focuses on the relevance of research methods within agency work, where most social work graduates will be employed rather than strictly an academic setting. With a focus on generalist social work practice, she offers a clear and concise overview of the research process, including identifying research questions, selecting appropriate research designs, and analyzing data. Using real-world examples and case studies, Marlow helps readers understand how research can be used to inform social work practice and drive positive change in communities. With a strong emphasis on ethics and cultural competence, this text prepares social work students and professionals to conduct research.
