An Apology For The Value Of Human Life:

An Apology for the Value of Human Life David C. Thomasma, 1983 Valuing Life John Kleinig, 2014-07-14 Abortion euthanasia capital punishment war genetic engineering and fetal experimentation environmental and animal rights these topics inspire some of today's most heated public controversies And it is fashionable to pursue these debates in terms of the negative query Under what conditions may life be disregarded or terminated John Kleinig asks a different more positive question What may be said in behalf of life Looking at the full range of appeals to life's value he considers a variety of issues Is livingness as such to be affirmed and respected Is there an ascending order of plant animal and human life Does human life possess a distinctive claim or must we discriminate between humans that do and humans that do not have claims on us Kleinig shows that assertions about valuing life camouflage a complex normative vocabulary about worth reverence sanctity dignity respect and rights And life too is subject to an assortment of understandings Sensitive to the frameworks informing diverse appeals to life's value this comprehensive work will interest readers concerned with the environment animal rights or bioethics Originally published in 1991 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **Justice through Apologies** Nick Smith, 2014-03-24 In this follow up to *I Was Wrong The Meanings of Apologies* Nick Smith expands his ambitious theories of categorical apologies to civil and criminal law After rejecting court ordered apologies as unjustifiable humiliation this book explains that penitentiaries were originally designed to bring about penance something like apology and that this tradition has been lost in the assembly line of mass incarceration Smith argues that the state should modernize these principles and techniques to reduce punishments for offenders who demonstrate moral transformation through apologizing Smith also explains the counterintuitive situation whereby apologies come to have considerable financial worth in civil cases because victims associate them with priceless matters of the soul Such confusions allow powerful wrongdoers to manipulate perceptions to disastrous effect such as when corporations or governments assert that apologies do not equate to accepting blame or require reform or redress On Moral Medicine Stephen E. Lammers, Allen Verhey, 1998-05-11 Collecting a wide range of contemporary and classical essays dealing with medical ethics this huge volume is the finest resource available for engaging the pressing problems posed by medical advances American Health Care Charles J. Dougherty, 1988-03-03 Is our present health care system biased against people with limited education and income Does every American have a moral right to health care If so what kinds of care and how much In a provocative look at American health care delivery Charles J. Dougherty considers these and many other questions His book fills an important niche in contemporary medical ethics and

public health literature by combining a description and analysis of the American health care system as it actually operates today with an assessment of recent philosophical writings on justice In the first section Dougherty describes inequalities in health care delivery to blacks the poor and the less educated He then reviews the philosophical theories of utilitarianism egalitarianism contractarianism and libertarianism applies them to health care issues and argues for a moral right to health care He considers available policy alternatives concluding that the empirical data and our understanding of justice and human rights should commit us to a national health care plan supported by national health insurance

Injustice and Rectification Rodney C. Roberts, 2005 This book aims to help answer two questions that Western philosophy has paid relatively little attention to what is injustice and what does justice require when injustice occurs Injustice and Rectification offers a taxonomy of justice which sets forth an initial framework for a moral theory of justice and focuses on framing a conception of rectificatory justice The taxonomy is ground for this book's eleven other essays in which a diverse group of authors brings philosophical analysis to bear on the idea of injustice itself and on some important conceptual and normative issues concerning the rectification of injustice

Helping and Healing Edmund D. Pellegrino, David C. Thomasma, 1997-02-01 Exploring the moral foundations of the healing relationship Edmund D Pellegrino and David C Thomasma offer the health care professional a highly readable Christian philosophy of medicine This book examines the influence religious beliefs have on the kind of person the health professional should be on the health care policies a society should adopt and on what constitutes healing in its fullest sense Helping and Healing looks at the ways a religious perspective shapes the healing relationship and the ethics of that relationship Pellegrino and Thomasma seek to clarify the role of religious belief in health care by providing a moral basis for such commitment as well as a balancing role for reason This book establishes a common ground for believers and skeptics alike in their dedication to relieve suffering by showing that helping and healing require an involvement in the religious values of patients It clearly argues that religion provides crucial insights into medical practice and morality that cannot be ignored even in our morally heterogeneous society Central to the authors message is the concept of patients vulnerabilities and the need to help them recover not only from the disease but also from an existential assault on their personhood They then show how this understanding can move caregivers to view their professions as vocations and thereby change the nature of health care from a business to a community of healing Physicians nurses administrators clergy theologians and other health professionals and church leaders will find this volume helpful for their own reflections on the role of religion in the health care ministry and for making a religious commitment integral to their professional lives

Philosophical Foundations of the Law of Torts John Oberdiek, 2014-02 This book offers a rich insight into the law of torts and cognate fields and will be of broad interest to those working in legal and moral philosophy It has contributions from all over the world and represents the state of the art in tort theory

The Life Worth Living in Ancient Greek and Roman Philosophy David Machek, 2023-04-27 The account of the best life for humans i.e. a happy

or flourishing life and what it might consist of was the central theme of ancient ethics But what does it take to have a life that if not happy is at least worth living compared with being dead or never having come into life This question was also much discussed in antiquity and David Machek s book reconstructs for the first time philosophical engagements with the question from Socrates to Plotinus Machek s comprehensive book explores ancient views on a life worth living against a background of the pessimistic outlook on the human condition which was adopted by the Greek poets and also shows the continuities and contrasts between the ancient perspective and modern philosophical debates about biomedical ethics and the ethics of procreation His rich study of this relatively neglected theme offers a fresh and compelling narrative of ancient ethics

Value and Environmental Education Dr. Balbinder Singh, Dr. Anil Kumar, 2021-05-19 Value denotes the degree of importance of some thing or action with the aim of determining what actions are best to do or what way is best to live or to describe the significance of different actions It may be described as treating actions themselves as abstract objects putting value to them It deals with right conduct and living a good life in the sense that a highly or at least relatively highly valuable action may be regarded as ethically good and an action of low in value or somewhat relatively low in value may be regarded as bad What makes an action valuable may in turn depend on the ethic values of the objects it increases decreases or alters An object with ethic value may be termed an ethic or philosophic good Values can be defined as broad preferences concerning appropriate courses of action or outcomes As such values reflect a person s sense of right and wrong or what ought to be Equal rights for all Excellence deserves admiration and People should be treated with respect and dignity are representative of values Values tend to influence attitudes and behavior Types of values include ethical moral values doctrinal ideological values social values and aesthetic values It is debated whether some values that are not clearly physiologically determined such as altruism are intrinsic and whether some such as acquisitiveness should be classified as vices or virtues Environmental education EE refers to organized efforts to teach how natural environments function and particularly how human beings can manage behavior and ecosystems to live sustainably It is a multi disciplinary field integrating disciplines such as biology chemistry physics ecology earth science atmospheric science mathematics and geography
