

You may be using this book with either the ATARI 400 or the ATARI 800 personal computer system. The 400 computer console has a flat-panel keyboard and is used with your television set and, possibly, the optional ATARI 410 program recorder. The 800 computer console has a typewriter-like keyboard. Both consoles attach to your television set. There are other differences between the two systems which we will note as we go along.

Before you go any farther, it would be a good idea to set up your computer so that you can use it as you read this book. Packed in the carton with your ATARI 400 or 800 you will find the Operators Manual. This manual will tell you how to attach the television, turn on the power to your computer, and use the program cartridges which come with it. The Operators Manual contains a lot of information so don't feel you must read every word of it right away. But do get your computer "up and running in BASIC" if you haven't done so before, and then come back to this book.

Welcome back! Now let's get better acquainted with your ATARI computer console.

Of course, the most obvious feature of the computer is its keyboard. The keyboard of the ATARI 800 looks like this:
