American Images of China, 1931-1949 T. Christopher Jespersen, 1999-02-01 In the 1930 s and 1940 s the prevalent American view of China was that of a friendly democratic and increasingly Christian state in many ways akin to the United States This view was fostered by a wide range of literary political and business leaders including Pearl S Buck Franklin D Roosevelt Wendell Willkie Joseph Stillwell Claire Chennault and most notably the powerful publisher of Life and Time Henry R Luce This book shows how the notion of the Chinese as aspiring Americans helped shape American opinions and policies toward Asia for almost twenty years This notion derived less from the reality of Chinese historical or cultural similarities than from a projection of American values and culture in the American view fueled by various political economic and religious interests China was less a geographical entity than a symbol of American hopes and fears One of the more important consequences was the idealization of China and the demonization of Japan

American Images of China Oliver Turner, 2014-04-16 The United States and China are arguably the most globally consequential actors of the early twenty first century and look set to remain so into the foreseeable future This volume seeks to highlight that American images of China are responsible for constructing certain truths and realities about that country and its people It also introduces the understanding that these images have always been inextricable from the enactment and justification of US China policies in Washington and that those policies themselves are active in the production and reproduction of imagery and in the protection of American identity when seemingly threatened by that of China Demonstrating how past American images of China are vital to understanding the nature and significance of those which circulate today Turner addresses three key questions What have been the dominant American images of China and the Chinese across the full lifespan of Sino US relations How have historical and contemporary American images of China and the Chinese enabled and justified US China policy What role does US China policy play in the production and reproduction of American images of China Exploring and evaluating a wide ranging variety of sources including films and television programmes newspaper and magazine articles the records and journals of politicians and diplomats and governmental

documents including speeches and legal declarations this work will be of great interest to students and scholars of US foreign policy American politics China studies and international relations **Rethinking Global Urbanism** Xiangming Chen,Ahmed Kanna,2012-05-31 Arguing that the focus in global urban studies on cities such as New York London Tokyo in the global North Mexico City and Shanghai in the developing world and other major nodes of the world economy has skewed the concept of the global city toward economics this volume gathers a diverse group of contributors to focus on smaller and less economically dominant cities It highlights other important and relatively ignored themes such as cultural globalization alternative geographies of the global and the influence of deeper urban histories particularly those relating to colonialism in order to advance an alternative view of the global city *Confronting Communism* Scott Kaufman,2001

Asian/American David Palumbo-Liu,1999 This book argues that the invention of Asian American identities serves as an index to the historical formation of modern America By tracing constructions of Asian American to an interpenetrating dynamic between Asia and America the author obtains a deeper understanding of key issues in American culture history and society The formation of America in the twentieth century has had everything to do with westward expansion across the Pacific frontier and the movement of Asians onto American soil After the passage of the last piece of anti Asian legislation in the 1930 s the United States found it had to grapple with both the presence of Asians already in America and the imperative to develop its neocolonial interests in East Asia The author argues that under these double imperatives a great wall between Asian and American is constructed precisely when the two threatened to merge Yet the very incompleteness of American identity has allowed specific and contingent fusion of Asian and American at particular historical junctures From the importation of Asian labor in the mid nineteenth century the territorialization of Hawaii and the Philippines in the late nineteenth century through wars with Japan Korea and Vietnam and the Cold War with China to today s Asian Pacific Economic Cooperation group the United States in the modern age has seen its national identity as strongly attached to the Pacific As this has taken place so has the formation of a variety of Asian American identities Each contains a specific notion of America and reveals a particular conception of Asian and American Complicating the usual notion of identity politics and drawing on a wide range of writings sociological historical cultural medical anthropological geographic economic journalistic and political the author studies both how the formation of these identifications discloses the response of America to the presence of Asians and how Asian Americans themselves have inhabited these roles and resisted such categorizations inventing their own particular subjectivities as Americans **Making Women's Histories** Pamela Susan Nadell,Kate Haulman,2013-01-01 Making Women s Histories showcases the transformations that the intellectual and political production of women s history has engendered across time and space It considers the difference women s and gender history has made to and within national fields of study and to what extent the wider historiography has integrated this new knowledge What are the accomplishments of women s and gender history What are its shortcomings What is its future The contributors

discuss their discovery of women's histories the multiple turns the field has taken and how place affected the course of this scholarship. Noted scholars of women's and gender history stand atop such historiographically defined vantage points as Tsarist Russia, the British Empire in Egypt and India, Qing dynasty China, and the U.S. roiling through the 1960s. From these and other peaks they gaze out at the world around them, surveying trajectories in the creation of women's histories in recent and distant pasts and envisioning their futures.

China Under Western Gaze: Representing China In The British Television Documentaries 1980-2000 Qing Cao, 2014-05-16 This book presents a critical analysis of the images of China portrayed in British television documentaries between 1980 and 2000. The examination is contextualized within the profound transformations of the post-reform China and global political structures in the last two decades of the 20th century. Using an innovative analytical framework based on Vladimir Propp, the book focuses on how different images of China are constructed through an effective use of TV narrative strategies. In particular, it details how various strands of Western modernity underpin major discourses about China. The book will be valuable to the understanding of how China was perceived in the West during one of the most dramatic moments in modern history.

Western Perspectives On The People's Republic Of China: Politics, Economy And Society Colin Mackerras, 2015-03-05 How have Westerners seen the People's Republic of China over the years? The question raises many important issues which this book aims to present, analyze and explain. The basic conclusion is that Western perspectives are somewhat more complex than simply viewing China's realities. Involved also are politics and power relations, trends in journalism and scholarship as well as individual and group personalities and psychologies. Based on extensive personal experiences in China dating back to 1964 and wide-ranging travel in Tibet and ethnic regions since the 1980s, the author attempts to distinguish trends in different Western countries. However, most of the material will concern the United States which has been the dominant contributor to Western perspectives during the whole period of concern to this book. The perspectives are taken up by topic including politics, economy, society and ethnic minorities. Inherent in each topic is the way cultures see and react towards each other. Images and perspectives can affect policy and have done so many times in the past which adds to the importance of this book. It also takes up questions of the sources of Western perspectives both in terms of direct sources such as newspapers, television or the internet and deeper ones such as social values and temperament.
