American Geological Literature 16691850:

Geological Sciences in the Antebellum South James X. Corgan, 2014-06-15 Nine essays that provide detailed information about the early geological exploration of the southeastern United States Originally presented under the aegis of the Geological Society of America these essays cover observations and studies made between 1796 and the 1850s Each essay includes fascinating biographic sketches of the author a bibliography and an index **History Of Science In The U.S.**

Clark A. Elliott, 2021-11-18 First published in 1996 The intention of this volume is two fold first to give a chronologically arranged overview of selected data on the history of science in the United States and second to orient the reader to the substantial reference literature and research sources as guidance to further study of the topic The subject areas that are covered include astronomy biology chemistry geology mathematics physics and their related disciplines areas such as anthropology and psychology are covered to a lesser extent Science is the central focus but the content of the work recognizes that the boundaries between subjects or activities are not absolute and certainly not when coverage spans several centuries Historical Writing on American Science Sally Gregory Kohlstedt, Margaret W. Rossiter, 1986 *Women of Science* Gabriele Kass-Simon, Patricia Farnes, Deborah Nash, 1993

Women of Science is a collection of essays dealing with contributions women have made to various scientific disciplines written by women scientists in those disciplines The areas covered are astronomy archaeology biology chemistry crystallography engineering geology mathematics medicine and physics The women who have written these essays are for the most part not professional historians but rather scientific professionals who felt the necessity of researching the contributions women have made to the development of their fields The essays are unique not only because they recover lost women who made significant contributions to their disciplines but also because they are written with a depth of understanding that only a scientist working in a specific area can have The essays will be of interest not only to students especially women students of science who may be unaware of the many contributions women have made but also to readers of the history of science whoses texts more often than not fail to include the work of most women scientists American Scientist , 1942 **Looking Close and Seeing Far: Samuel Seymour, Titian Ramsay Peale, and the Art of the Long Expedition, 1818Ð1823 ,**

Geology Emerging University of Illinois at Urbana-Champaign. Library, Dederick C. Ward, Albert V. Carozzi, 1984 **Earth Sciences History** , 1990 **American National Biography** John Arthur Garraty, Mark Christopher Carnes, 1999 **New York State Natural History Survey, 1836-1845** Michele Aldrich, 2000
