American Medicine The Quest For Competence:

American Medicine Mary-Jo DelVecchio Good, 2023-09-01 What does it mean to be a good doctor in America today How do such challenges as new biotechnologies the threat of malpractice suits and proposed health care reform affect physicians ability to provide quality care These and many other crucial questions are examined in this book the first to fully explore the meaning and politics of competence in modern American medicine Based on Mary Jo DelVecchio Good s recent ethnographic studies of three distinct medical communities physicians in rural California academics and students involved in Harvard Medical School s innovative New Pathway curriculum and oncologists working on breast cancer treatment the book demonstrates the centrality of the issue of competence throughout the medical world Competence it shows provides the framework for discussing the power struggles between rural general practitioners and specialists organizational changes in medical education and the clinical narratives of high technology oncologists In their own words practitioners students and academics describe what competence means to them and reveal their frustration with medical legal institutions malpractice and the limitations of peer review and medical training Timely and provocative this study is essential reading for medical professionals academics anthropologists and sociologists as well as health care policymakers What does it mean to be a good doctor in America today How do such challenges as new biotechnologies the threat of malpractice suits and proposed health care reform affect physicians ability to provide quality care These and many other cru *American Rehabilitation* ,1998

The Social Medicine Reader, Volume II, Third Edition Jonathan Oberlander, Mara Buchbinder, Larry R. Churchill, Sue E. Estroff, Nancy M. P. King, Barry F. Saunders, Ronald P. Strauss, Rebecca L. Walker, 2019-05-31 The extensively updated and revised third edition of the bestselling Social Medicine Reader provides a survey of the challenging issues facing today s health care providers patients and caregivers with writings by scholars in medicine the social sciences and the humanities

Handbook of Cultural Sociology Laura Grindstaff, John R. Hall, Ming-Cheng M. Lo, 2010-09-13 Pt 1 Sociological programs of cultural analysis pt 2 Theories and methodologies in cultural analysis pt 3 Aesthetics ethics and cultural legitimacy pt 4 Individuals and groups identities and performances pt 5 Culture and stratification pt 6 Making using culture pt 7 Cultures of work and professions pt 8 Political cultures pt 9 Global cultures global processes pt 10 Cultural processes and change

Rationalizing Medical Work Marc Berg, 1997 Advocates argue that they will make medical practice more rational more uniform and more efficient and that they will transform the art of medical work into a science Critics argue that formal tools cannot and should not supplant humans in most real life tasks Body, Meaning, Healing T. Csordas, 2002-09-05 Exactly where is the common ground between religion and medicine in phenomena described as religious healing In what sense is the human body a cultural phenomenon and not merely a biological entity Drawing on over twenty years of research on topics ranging from Navajo and Catholic Charismatic ritual healing to the cultural and religious implications of virtual reality in biomedical technology *Body Meaning Healing* sensitively examines these questions about human experience and the

meaning of being human In recognizing the way that the meaningfulness of our existence as bodily beings is sometimes created in the encounter between suffering and the sacred these penetrating ethnographic studies elaborate an experimental understanding of the therapeutic process and trace the outlines of a cultural phenomenology grounded in embodiment

In the Nation's Compelling Interest Institute of Medicine, Board on Health Sciences Policy, Committee on Institutional and Policy-Level Strategies for Increasing the Diversity of the U.S. Health Care Workforce, 2004-07-29 The United States is rapidly transforming into one of the most racially and ethnically diverse nations in the world Groups commonly referred to as minorities including Asian Americans Pacific Islanders African Americans Hispanics American Indians and Alaska Natives are the fastest growing segments of the population and emerging as the nation's majority Despite the rapid growth of racial and ethnic minority groups their representation among the nation's health professionals has grown only modestly in the past 25 years This alarming disparity has prompted the recent creation of initiatives to increase diversity in health professions In the Nation's Compelling Interest considers the benefits of greater racial and ethnic diversity and identifies institutional and policy level mechanisms to garner broad support among health professions leaders community members and other key stakeholders to implement these strategies Assessing the potential benefits of greater racial and ethnic diversity among health professionals will improve the access to and quality of healthcare for all Americans

Genetics and Global Public Health Simon Dyson, Karl Atkin, 2014-06-11 Sickle cell and thalassaemia are among the world's most common genetic conditions They are especially common in Africa Brazil the Caribbean the Middle East and Asia They affect all ethnic groups but they particularly impact on minority ethnic groups in North America Europe and Australasia Much research has focused on clinical laboratory and genetic studies of these conditions Through a wide ranging selection of readings based on social scientific research into sickle cell and thalassaemia this book seeks to redress this imbalance This is important as through an examination of the different social economic and cultural contexts of the lives of people living with sickle cell or thalassaemia the contributors demonstrate that people are more than the sum of their genes and that their life experiences are rarely derived solely from the clinical severity of their condition but depend on the social context of their lives Genetics and Global Public Health presents a new concluding chapter which highlights the critical nature of social science research for sickle cell and thalassaemia communities providing key insights into the social contexts of human behaviour and analysing how societal arrangements could change to assist people living with either condition It will be of great interest to postgraduate and research students as well as professionals working in the field of public health This book was originally published as a special issue of the journal Ethnicity and Health

Handbook of the Sociology of Medical Education Caragh Brosnan, Bryan S. Turner, 2009-09-10 The Handbook of the Sociology of Medical Education provides a contemporary introduction to this classic area of sociology by examining the social origin and implications of the epistemological organizational and demographic challenges facing medical education in the twenty first century Beginning with reflections on the historical and theoretical

foundations of the sociology of medical education the collection then focuses on current issues affecting medical students the profession and the faculty before exploring medical education in different national contexts Leading sociologists analyze the intersection of medical education and social structures such as gender ethnicity and disability the effect of changes in medical practice such as the emergence of evidence based medicine on medical education and the ongoing debates surrounding the form and content of medical curricula By examining applied problems within a framework which draws from social theorists such as Pierre Bourdieu this new collection suggests future directions for the sociological study of medical education and for medical education itself

Learning to Save the World Betsey Behr Brada, 2023-02-15 *Learning to Save the World* provides an innovative analysis of how individuals inhabit refuse and reconfigure the contours of global health In 2001 Botswana's government faced with one of the highest HIV prevalence rates in the world committed itself to sub-Saharan Africa's first free public HIV treatment program US based private foundations and medical schools offered support to demonstrate the feasibility of public HIV treatment in Africa Given US interest and investment in global health this support created opportunities for US physicians and medical trainees to interact with local practitioners treat patients and shape health policy in Botswana Although global health has emerged as a powerful call to planetary moral action the nature of this exhortation remains unclear Is global health a new movement for social justice or is it neocolonial creating new dependencies under the banner of humanitarianism Betsey Behr Brada shows that global health is a frontier an imaginative framework that organizes the space time and ethics of encounter *Learning to Save the World* reveals how individuals and collectivities engaged in global health visiting experts as well as local clinicians and patients come to regard themselves and others in terms of this framework
