Biological Solar Energy Conversion Akira Mitsui, 2012-12-02 *Biological Solar Energy Conversion* is a publication comprised of formal papers presented during the 1976 conference on Biological Solar Energy Conversion held at the Rosenstiel School of Marine and Atmospheric Science. The second and third sections feature papers that dealt with the synthesis of organic compounds from carbon dioxide and nitrogen fixation and production of single cell protein. The last section of the publication presents papers that show future trends and practical applications involved in the biological conversion of solar energy. This book will be an excellent reference for researchers working on energy research and development.
