Brenner Paperback By Burger Hermann:

Brenner Hermann Burger, 2022-07-05 Hermann Burger was an artist who went the whole hog every time didn't conserve himself. He was a man with a big longing for happiness. Marcel Reich Ranicki. Appearing in English for the very first time. *Brenner* is a delightfully unusual novel full of dark humor tracing the childhood memories of the book's eponymous narrator, a scion of an ancient cigar dynasty. Perpetually shrouded in a thick cloud of cigar smoke, Herman Arbogast Brenner, scion of an old and famous cigar dynasty, has decided to kill himself but not until he has written down his forty-six years of life in a Proustian attempt to conjure the wounds, joys, and sensations of his childhood in the rolling countryside of the Aargau region of Switzerland. Estranged from his wife and two children, he decides there is no point in squirrelling away his fortune, so he buys himself a Ferrari 328 GTS and drives around sharing cigars with his few remaining friends. In this roman clef, writing and smoking become intertwined through the act of remembering, as Brenner, a fallible, wounded yet lovable antihero, searches for epiphany, attempting to unearth memories just out of reach: the glimmer of a red toy car, the sound of a particular chord played on the piano, the smell of the cigars themselves. *Brenner* is the final work from Hermann Burger, who died by suicide in 1989. The book comes out just days before what would have been the author's 80th birthday. Subject Guide to Books in Print, 1997 **Methodological and Historical Essays in the Natural and Social Sciences** Robert S. Cohen, Marx W. Wartofsky, 2012-12-06 Modern philosophy of science has turned out to be a Pandora's box. Once opened, the puzzling monsters appeared: not only was the neat structure of classical physics radically changed, but a variety of broader questions were let loose bearing on the nature of scientific inquiry and of human knowledge in general.

Philosophy of science could not help becoming epistemological and historical and could no longer avoid metaphysical questions even when these were posed in disguise Once the identification of scientific methodology with that of physics had been queried not only did biology and psychology come under scrutiny as major modes of scientific inquiry but so too did history and the social sciences particularly economics sociology and anthropology And now new monsters are emerging for example medicine and political science as disciplined inquiries This raises anew a much older question namely whether the conception of science is to be distinguished from a wider conception of learning and inquiry Or is science to be more deeply understood as the most adequate form of learning and inquiry whose methods reach every domain of rational thought Is modern science matured reason or is it simply one historically adapted and limited species of western reason In our colloquia at Boston University over the past fourteen years we have been probing and testing the scope of philosophy of science
