Navigating the Research-Policy Relationship Mark Rickinson, Marcia McKenzie, 2023-09-26 Drawing on studies in environmental and sustainability education this book brings together new work that has explored the research policy interface in varied contexts and from diverse perspectives It will be beneficial to those interested in understanding the interface between research and policy The relationship between research and policy has become an increasing focus for theoretical inquiry empirical investigation and practical development across many different fields This volume highlights new empirical insights theoretical ideas practical examples and methodological approaches for understanding navigating and developing more productive research policy relationships This book will be beneficial to anyone who is interested in understanding the interface between research and policy The chapters in this book were originally published in the journal *Environmental Education Research* Catalog of audiovisual productions United States. Assistant Secretary of Defense (Public Affairs), 1984 Research in Education , 1974 *Public Finance of the Dutch Republic in Comparative Perspective* Wantje Fritschy, 2017-04-11 This study offers the first complete overview of the remarkable public finances of the Dutch Republic of the United Provinces Wantje Fritschy has analysed the development and structure of its public revenue and expenditure She argues that a tax revolution and the fiscal resilience of the provinces together were more important for its surprising performance than Holland's public debt alone and the institutional and economic characteristics of its urban system were more important than wealth due to foreign trade Comparisons with the fiscal systems of three more centralized states the Venetian Republic Britain and the Ottoman Empire underline the crucial importance of long term urbanization trajectories in understanding early modern fiscal performance It was not because it was federal that the Dutch Republic collapsed **Geoethics** S. Peppoloni, G. Di Capua , 2015-08-24 This Special Publication will be an important tool for geoscientists aimed at increasing the awareness of their societal role and responsibility in conducting education research and practice activities What are the responsibilities of a geoscientist And what motivations are needed to push geoscientists to practice the Earth sciences in an ethical way The major environmental challenges affecting human communities require not only a strictly scientific and technical preparation by the geoscientists but also a reflection on their broader obligations towards society It is important that geoscientists consider geoethics as an indispensable framework on which to base their training and activity The principles of geoethics can guide them to pursue the common good by weighing the benefits and costs of each choice and identifying eco friendly and society friendly solutions that guarantee the respect of the right balance between human life and the dynamics of the Earth Communication and dissemination of geosciences should become core activities in building a knowledge based society which is able better to protect itself and the Earth ecosystems in order to

guarantee a life in harmony with our planet for future generations
