Academic Capitalism Sheila A. Slaughter, 1999 **Academic Capitalism: Politics, Policies, and the Entrepreneurial University** Sheila Slaughter, 1997 **Academic Capitalism and the New Economy** Sheila Slaughter, Gary

Rhoades, 2009-06-01 As colleges and universities become more entrepreneurial in a post industrial economy they focus on knowledge less as a public good than as a commodity to be capitalized on in profit oriented activities In *Academic Capitalism and the New Economy* higher education scholars Sheila Slaughter and Gary Rhoades detail the aggressive engagement of U S higher education institutions in the knowledge based economy and analyze the efforts of colleges and universities to develop market and sell research products educational services and consumer goods in the private marketplace Slaughter and Rhoades track changes in policy and practice revealing new social networks and circuits of knowledge creation and dissemination as well as new organizational structures and expanded managerial capacity to link higher education institutions and markets They depict an ascendant academic capitalist knowledge learning regime expressed in faculty work departmental activity and administrative behavior Clarifying the regime s internal contradictions they note the public subsidies embedded in new revenue streams and the shift in emphasis from serving student customers to leveraging resources from them Defining the terms of academic capitalism in the new economy this groundbreaking study offers essential insights into the trajectory of American higher education Higher Education: Handbook of Theory and Research

John C. Smart, 2007-05-16 Published annually since 1985 the Handbook series provides a compendium of thorough and integrative literature reviews on a diverse array of topics of interest to the higher education scholarly and policy communities Each chapter provides a comprehensive review of research findings on a selected topic critiques the research literature in terms of its conceptual and methodological rigor and sets forth an agenda for future research intended to advance knowledge on the chosen topic The Handbook focuses on twelve general areas that encompass the salient dimensions of scholarly and policy inquiries undertaken in the international higher education community The series is fortunate to have attracted annual contributions from distinguished scholars throughout the world *Academic Capitalism* Richard Münch, 2014-04-16 This book investigates the intensifying struggle for excellence between universities in a globalized academic field The rise of the entrepreneurial university and academic capitalism are superimposing themselves on the competition of scientists for progress of knowledge and recognition by the scientific community The result is a sharpening institutional stratification of

the field This stratification is produced and continuously reproduced by the intensified struggle for funds with the shrinking of block grants and the growing significance of competitive funding as well as the increasing impact of international and national rankings on academic research and teaching The increased allocation of funds on the basis of performance leads to overinvestment of resources at the small top and underinvestment for the broad mass of universities in the middle and lower ranks There is a curvilinear inverted u shaped relationship of investments and returns in terms of knowledge production Paradoxically the intrusion of the economic logic and measures of managerial controlling into the academic field imply increasing inefficiency in the allocation of resources to universities The top institutions suffer from overinvestment the rank and file institutions from underinvestment The economic inefficiency is accompanied by a shrinking potential for renewal and open knowledge evolution
