## **Autonomy In Organizational Life:**

**Autonomy in Organizational Life** David Moment, Dalmar Fisher, Gerald C. Leader, 1975      **Dualities, Dialectics, and Paradoxes in Organizational Life** Moshe Farjoun, Wendy Smith, Ann Langley, Haridimos Tsoukas, 2018-07-26 Contradictions permeate and propel organizational life including tensions between reaching globally while focusing locally competing while also cooperating performing reliably while experimenting taking risks and learning or granting autonomy while constraining freedom These tensions give organizational members pause but also spur them to take action they may be necessary for preserving the social order but are also required to transform it Drawing on the Eighth International Symposium on Process Organization Studies *Dualities Dialectics and Paradoxes in Organizational Life* examines how contradictions fuel emergent dynamic systems and stimulate novelty adaption and transformations It uses conceptual and empirical studies to offer insight into how process theorizing advances understanding of organizational contradictions to shed light on how dialectics paradoxes and dualities fuel persistence and transformation and to explore the convergence and divergence of dialectics paradox and dualities Taken together it offers key insights to inform persistent contradictory dynamics in organizations and organizational studies      **The Civilized Organization** Ad van Iterson, 2002-01-01 Topics covered in this title include organizing discourse negotiating boundaries crossing cultures and theorizing practice      *Organizational Public Relations* Christopher Spicer, 2013-11-05 Public relations practitioners are often called upon to help chart their organization s strategic development thus functioning as managerial decision makers linking the organization to its larger environment This book is about understanding organizations especially the role played by organizational decision making in the development and implementation of public relations programs and activities It emphasizes the ways in which an organization s culture and decision making processes ultimately influence the success or failure of their public relations efforts The research case studies and author s interpretations and suggestions explore the often confusing netherworld of organizational mindsets particularly as those world views affect the organization s relations with clients and other stakeholders Understanding organizational politics is the way to understanding how and why decisions are made by the organization s dominant coalition The primary goal of this text is to enhance our understanding of the ways in which organizations work the political process that accompanies organizational decision making As an instrumental participant in the organizational political process the public relations practitioner must possess knowledge and understanding of the organization s political process in order to succeed within that organization Given the need for public relations practitioners to form coalitions negotiate consensus and advocate organizational interests the political system metaphor is most appropriate for understanding the relationship between organizational power and organizational public relations This book then steps back from a focus solely on the design of public relations programs and instead examines how the impetus for those programs emerges within the organization as a result of organizational politics in action Its special features include practitioner responses at the end of each chapter

providing commentary on the usefulness of the ideas presented sidebars from popular sources illustrating theories new case studies merging of management and organizational theory and research with communication theory and research a focus on external stakeholders from both an advocacy and a collaborative frame resulting in the creation of a collaborative advocacy framework for external communication and an extended examination of ethical considerations pertaining to organizational decision making and communication      *Dark Sides of Organizational Life* H. Cenk Sözen,H. Nejat Basım,2023-04-28

**Managing Universities** Ivar Bleiklie, Jürgen Enders, Benedetto Lepori, 2017-07-31 This book asks how modern universities are organized and managed and questions whether 30 years of university reforms have resulted in stronger managerial structures and leadership control It further asks whether current organisational and decision making structures can be explained by public reform policies The book offers a coherent empirically grounded and theoretically driven presentation of data and core ideas behind a large scale comparative study of 26 universities across eight European countries It focuses on the strength of university managerial structures the role of academics and how universities relate to and depend on their environment to governments and other actors to funders to evaluators and to external stakeholders It further explores how higher education policies are shaped by and affect universities Written by a cross disciplinary team of European scholars this book is unique both in its wide coverage and the depth of its analyses It will be of great interest to scholars graduate students and advanced undergraduates in the fields of organisation theory and sociology policy studies comparative public policy and administration and higher education studies It will also be of interest to higher education policy makers and administrators
