Axis Armorbombersfighters:

Wings of War James P. Busha, 2015-09-25 Experience the exciting combat tales of both Allied and Axis pilots around the world during World War II. *Wings of War* encompasses the World War II air war from late 1939 through 1945 and provides a chronological snapshot not only of famous and significant events from the global air war but also of other lesser known events that are equally thrilling and important. Over three dozen different Allied and Axis airplanes are featured giving you a unique experience at the controls of a variety of World War II's famed fighters, bombers, liaison, and jet airplanes. The action is truly global from the skies over England, Greenland, mainland Europe, the African deserts, the CBI Theater, the entire Pacific Theater including the Aleutians, Russia, Japan, and China, and many more. This is one book no fan of warbirds will want to miss. Here are just a few of the stories included about World War II aces from author Jim Busha's vast archival research and interviews: A pilot that flew a P-36 against the Japanese at Pearl Harbor on December 7th, 1941 while still in his Sunday pajamas; A B-25 pilot who launched off the USS Hornet along with his fellow Doolittle Raiders; P-40 pilots who flew against Rommel and his Afrika Korps; A PB-4Y pilot helped locate and recover a downed Zero over the Aleutians which was later used as a test bed to learn its deadly tricks.

The Axis Forces 9 Massimiliano Afiro, 2019-02-17 In this issue, let's start with the second part of the article dedicated to the Dutch Legion, richly illustrated. We continue with the biography of Zvonimir Bernwald, at first a volunteer in the Handschar Division and then in the 31st SS Division. It continues with the third part of the article dedicated to the Barbarigo battalion on the Anzio front with a new excerpt from the new book by Tomasz Borowski on the last combat actions of the French volunteers of Charlemagne, the fourth and final part of the photographic report dedicated to the SS Hauptsturmführer Hans Jürgen Hartmann, and we close with a long and comprehensive article on Romanian armored formations.

[Hitler's and Hirohito's 'Kamikaze' Flying Bombs](#) William Wolf, 2025-11-30 On 1 April 1945, US troops launched the largest amphibious assault of the Pacific War on the heavily defended island of Okinawa. Supporting the invasion, the USS West Virginia participated in the bombardment of entrenched Japanese defenders. That evening, a Japanese aircraft launched a Yokosuka MXY 7 Ohka, a rocket-powered kamikaze plane. West Virginia was hit by an Ohka, becoming the first ship damaged by such a weapon. Twelve days later, the USS Mannert L. Able became the first ship sunk by an Ohka. The deployment of the Ohka was a desperate measure by Japan as the war turned against them. This manned flying bomb evolved from earlier kamikaze tactics. However, the Germans had also considered similar weapons. As early as 1944, figures close to Hitler, such as Otto Skorzeny and Hanna Reitsch, advocated for kamikaze missions. Hitler authorized the creation of the Leonidas Staffeln to prepare for these attacks, leading to the development of the Messerschmitt Me 328 and Fieseler Fi 103R, also known as the Reichenberg. Though the Fi 103R began production in October 1944, the changing dynamics of the war rendered it obsolete by the time it was ready for use. The project was formally abandoned in March 1945. This book details the

development of both the Ohka and Reichenberg
