H. Merrills,2005-08-11 Examines the role of geography in the historical writings of the early medieval period **Women in Medieval Europe 1200-1500** Jennifer Ward,2016-04-14 Women in Medieval Europe explores the key areas of female experience in the later medieval period from peasant women to Queens It considers the women of the later Middle Ages in the context of their social relationships during a time of changing opportunities and activities so that by 1500 the world of work was becoming increasingly restricted to women The chapters are arranged thematically to show the varied roles and lives of women in and out of the home covering topics such as marriage religion family and work For the second edition a new chapter draws together recent work on Jewish and Muslim women as well as those from other ethnic groups showing the wide ranging experiences of women from different backgrounds Particular attention is paid to women at work in the towns and specifically urban topics such as trade crafts healthcare and prostitution The latest research on women gender and masculinity has also been incorporated along with updated further reading recommendations This fully revised new edition is a comprehensive yet accessible introduction to the topic perfect for all those studying women in Europe in the later Middle Ages **Peasants Making History** Christopher Dyer,2022-06-02 Peasants have been despised underrated or disregarded in the past Historians and archaeologists are now giving them a more positive assessment and in Peasants Making History Christopher Dyer sets a new agenda for this kind of study Using as his example the peasants of the west midlands of England Dyer examines peasant society in relation to their social superiors their lords their neighbours and their households and finds them making decisions and taking options to improve their lives In their management of farming both cultivation of fields and keeping of livestock they made a series of modifications and some dramatic changes not just reacting to shifts in circumstances but also devising creative initiatives Peasants played an active role in the development of towns both by migrating into urban settings but also by trading actively in urban markets Industry in the countryside was not imposed on the rural population but often the result of peasant enterprise and flexibility If we examine peasant attitudes and mentalities we find them engaging in political life making a major contribution to religion recognizing the need to conserve the environment and balancing the interests of individuals with those of the communities in which they lived Many features of our world have medieval roots and peasants played an important part in the development of the rural landscape participation of ordinary people in government parish church buildings towns and social welfare The evidence to support this peasant centred view has to be recovered by imaginative interpretation and by using every type of source including the testimony of archaeology and landscape Family, Commerce, and Religion in
