Awaken The American Dream:

Awakening from the American Dream Master Charles Cannon, Will Willkinson, 2014-03-11 *Awakening From The American Dream From Crisis To Consciousness* is an expose of the American Dream as illusory enculturation. It is a call to awakening to true reality in which happiness is not something to be pursued but rather innately experienced as one's birthright. The book invites readers to wake up from the American Dream rather than trying to make it work or creating a new dream. A dream is a dream; it can never be reality. Part One focuses on the initial stages of awakening, beginning to question Dream beliefs like the pursuit of happiness: if you're chasing it, you don't have it. Part Two uses the Socratic Method to question popular myths about life in America relative to twelve specific areas of life like the economy, health, marriage, religion, etc. Readers are invited to challenge their own convictions and open to new possibilities. Part Three is about what it is like to live wide awake, taking personal responsibility for the reality you create and being a leader by example for others.

Awakening from the American Dream Rufus E. Miles, 1976 *AWAKENING FROM THE AMERICAN DREAM* establishes and supports the thesis that social and political limits to growth will bring Americans to the end of the era of growing affluence much sooner than physical factors that in fact the social and political limits are now being strongly felt. Rufus Miles analyzes twenty-two determinants that have brought American society to its present state and examines their probable future directions. He concludes that the much-discussed accelerative thrust has now ended and will probably never again be revived. He sees American society as highly vulnerable to further social deterioration, sabotage, and breakdown. Central to this is his thesis that high energy consumption has a centrifugal effect on the two most basic institutions, the family and the community. After analyzing both the physical dynamics and various ethical considerations involved in energy, population, and food, Mr. Miles assesses the human limits to the management of economic and political systems that are now so complex as to exceed the comprehension and management capability of political leaders. It is his conviction, conveyed with both passion and tough-minded realism, that America and the developed world must kick their addiction to enormous consumption of energy, reject the nuclear option, and turn toward energy conservation, new lifestyles, and economical conversion of solar energy. We must now develop a changed set of values and a new sense of direction. The search for a different destiny can be a deeply satisfying and self-renewing experience. *THE AUTHOR* Formerly the top career official of HEW and president of the Population Reference Bureau, Rufus E. Miles Jr. is a senior fellow and lecturer at the Woodrow Wilson School of Public and International Affairs, Princeton University.

Awakening and Reform William G. McLoughlin, 2013-03-06 In *Revivals Awakenings and Reform* McLoughlin draws on psychohistory sociology and anthropology to examine the relationship between America's five great religious awakenings and their influence on five great movements for social reform in the United States. He finds that awakenings and the revivals that are part of them are periods of revitalization born in times of cultural stress and eventuating in drastic social reform. Awakenings are thus the means by which a people or nation creates and sustains its identity in a changing world. This book is sensitive thought provoking and stimulating. It is must reading for those interested in awakenings and even though some may not revise their views as a result of McLoughlin's suggestive outline none can remain unmoved by the insights he has provided on the subject. Christian Century This is one of the best books I have read all year. Professor McLoughlin has again given us a profound analysis of our culture in the midst of revivalistic trends.
