Adrenal Medulla 1989 1991:

The Adrenal Medulla, 1989-1991 Stephen W. Carmichael, Susan L. Stoddard, 1992-10-13 The Adrenal Medulla 1989 1991 offers a comprehensive review of the world literature on the adrenal medulla published during this period The book emphasizes the role of the adrenal medulla in advancing our knowledge of neuroscience for example the Nobel Prize winning technique of patch clamping has been applied to stimulus secretion coupling in adrenal chromaffin cells The book also discusses such topics as the ability to image the distribution of calcium within individual neural cells the ability to measure individual packets of neurotransmitter as they are released from cells and advances in the understanding of ionic channels cell to cell interactions cell proliferation sympathoadrenal ontogeny growth factors enzymatic biosynthetic pathways electron and proton transfer and neural pathways Topics covered in clinical medicine include recent progress in the transplantation of the adrenal medulla to the brain as a treatment for Parkinson s disease and the latest reports on pheochromocytoma The Adrenal Medulla 1989 1991 is an essential book for neurobiologists neurochemists experimental biologists physiologists cell biologists and informed clinicians

Molecular and Cellular Endocrinology E. Edward Bittar, Neville Bittar, 1997

Molecular and Cell Endocrinology Cell Transplantation for Neurological Disorders Thomas B. Freeman, Hakan Widner, 1998-05-29 Distinguished medical researchers from around the world review novel neural reconstructive techniques that appear to be beneficial for Parkinson s disease and hold promise for treating Huntington s disease pain demyelinating diseases and stroke The contributors focus on those diseases for which clinical trials are either ongoing or likely to occur in the near future Among the topics reviewed are results and rationale for some of the leading transplant programs for the treatment of Parkinson s disease the use of PET scanning for patient evaluation autopsy studies of transplant recipients transplant immunology fetal tissue transplantation for Huntington s disease cellular transplantation for the treatment of pain and stroke and transplantation of myelinating cells A full discussion of the important ethical issues surrounding the use of fetal tissue for transplantation purposes is also included

Molecular and Cell Endocrinology , 1998-02-16 **Molecular and Cell Endocrinology** Psychopharmacology Bulletin , 1966

Neural Repair, Transplantation, and Rehabilitation Roger A. Barker, Stephen B. Dunnett, 1999 This book begins with a synopsis of experimental work underlying degeneration and recovery in the nervous system which is then discussed in the context of strategies to repair the central nervous system CNS and peripheral nervous system PNS The major part of the book is given over to the approach involving the use of transplanted tissues to replace and restore disrupted neural networks This experimental work has formed the basis for the emerging clinical trials employing neural grafts for diseases such as Parkinson s and Huntington s which are discussed in detail The book then goes on to discuss newer cellular strategies involving the manipulation of neural cells both in culture and genetically an approach that may ultimately be employed in the clinical situation Neural Repair Transplantation and Rehabilitation is unique in bridging the gap from experimental studies to clinical trials whilst also providing the non

specialist with a background in rehabilitation strategies as well as basic neuroscience It is recommended for all those involved in the management of patients with degenerative and traumatic injuries to the nervous system

Neurotrophic Factors Sandra E. Loughlin, James H. Fallon, 2012-12-02 This volume clearly synthesizes current information on defined neurotrophic factors emphasizing their localization and molecular cellular function in the central nervous system Brain development and aging neurodegenerative disorders plasticity and memory all are closely examined within the context of this rapidly expanding field Researchers in neurobiology cell biology and molecular biology will find Neurotrophic Factors an invaluable reference for their research libraries Offers the most up to date synthesis of concepts on neurotrophic factors in the nervous system Integrates molecular cellular and neuroanatomical concepts of neurotrophic factor function Includes special chapters on primary secondary and tertiary messenger systems Examines brain development differentiation neurodegenerative disorders and adult plasticity

Advances and Technical Standards in Neurosurgery F. Cohadon, V. V. Dolenc, J. Lobo Antunes, H. Nornes, J. D. Pickard, H.-J. Reulen, A. J. Strong, N. de Tribolet, C. A. F. Tulleken, 2012-12-06 As an addition to the European postgraduate training system for young neurosurgeons we began to publish in 1974 this series of Advances and Technical Standards in Neurosurgery which was later sponsored by the European Association of Neurosurgical Societies This series was first discussed in 1972 at a combined meeting of the Italian and German Neurosurgical Societies in Taormina the founding fathers of the series being Jean Brihaye Bernard Pertuiset Fritz Loew and Hugo Krayenbühl Thus were established the principles of European co operation which have been born from the European spirit flourished in the European Association and have throughout been associated with this series The fact that the English language is well on the way to becoming the international medium at European scientific conferences is a great asset in terms of mutual understanding Therefore we have decided to publish all contributions in English regardless of the native language of the authors All contributions are submitted to the entire editorial board before publication of any volume Our series is not intended to compete with the publications of original scientific papers in other neurosurgical journals Our intention is rather to present fields of neurosurgery and related areas in which important recent advances have been made The contributions are written by specialists in the given fields and constitute the first part of each volume

Intracellular Messengers C.M. Taylor, 2012-12-02 This important new reference work offers an outstanding collection of articles devoted to the discussion of intracellular messengers Extracellular stimuli first messengers bind to receptors on the plasma membrane of cells to trigger changes in the concentration of intracellular messengers second messengers which leads in turn to changes in cellular activity However the intracellular activities of so called third messengers may also be involved complicating the concept of a rigid sequence of events between receptor and response The preference for the term intracellular messengers and hence the title of this volume recognizes that a complex web of interactions between intercellular messengers determines the concentrations and ultimate effects of each

Central Nervous System Diseases Dwaine F. Emerich, Reginald L. Dean

III, Paul R. Sanberg, 1999-11-24 Prominent experimentalists critically review the animal models widely used in developing powerful new therapies for central nervous system diseases Coverage includes novel uses of animal models of Alzheimer's Parkinson's and Huntington's diseases and studies of aging Techniques that rely heavily on behavioral analyses as well as models developed from infusions of neurotoxins and from advances in molecular biology are thoroughly explicated as are models developed for more acute neurological conditions including traumatic brain injury and stroke Comprehensive and authoritative Central Nervous System Diseases Innovative Animal Models from Lab to Clinic offers neuroscientists pharmacologists and interested clinicians a unique survey of the most productive animal models of the leading neurological diseases currently employed to develop today's innovative drug therapies
