Adult Aphasia:

The Handbook of Adult Language Disorders Argye E. Hillis, 2013-05-13 This distinctive handbook is a key reference for both clinicians and researchers working in the scientific investigation of aphasia. The focus is on how the study of acquired language disorders has contributed to our understanding of normal language and its neural substrates and to the clinical management of language disorders. The handbook is unique in that it reviews studies from the major disciplines in which aphasia research is conducted: cognitive neuropsychology, linguistics, neurology, neuroimaging, and speech language pathology as they apply to each topic of language. For each language domain such as reading, there is a chapter devoted to theory and models of the language task, a chapter devoted to the neural basis of the language task focusing on recent neuroimaging studies, and a chapter devoted to clinical diagnosis and treatment of impairments in that domain. **Adult Aphasia** Harvey Halpern, 1972 *Adult Aphasia* Jon Eisenson, 1984 Language and Motor Speech Disorders in Adults Harvey Halpern, Robert M. Goldfarb, 2013 Rev ed of *Language and motor speech disorder in adults* Harvey Halpern 2nd ed c2000 *Adult Aphasia Rehabilitation* George Albyn Davis, M. Jeanne Wilcox, 1985 Language Intervention Strategies in Adult Aphasia Roberta Chapey, 1994 This newly revised and updated Fourth Edition continues to focus on speech therapy addressing concerns that aid in the rehabilitation and recovery of aphasia patients. Topics include assessment of language and communication, principles of language intervention, restorative approaches to language intervention, cognitive neuropsychological approach, implications, functional intervention, and treatment for each syndrome. Other approaches and therapy for associated neuropathologies of speech and language-related functions are also discussed. Assessment of Communication Disorders in Adults M.N. Hegde, Don Freed, 2020-10-02 *Assessment of Communication Disorders in Adults: Resources and Protocols* Third Edition offers a unique combination of scholarly information, invaluable resources, and time-saving protocols on assessment of communication disorders in adults. Most resource books offer limited research and scholarly information, thus making them unsuitable as textbooks for academic courses on assessment and diagnosis. Similarly, most traditional textbooks do not include practical, easy-to-use and time-saving resources and protocols that the practicing clinicians can readily use during assessment sessions. By combining the strengths of traditional textbooks with newer assessment resources and protocols, this one-of-a-kind book offers a single comprehensive source that is suitable as a textbook and useful as a practical clinical resource. This bestselling and trusted text covers the full range of communication disorders in adults, from aphasia to voice disorders. It gives a comprehensive outline of basic assessment procedures, provides a set of protocols that are necessary to assess any communication disorder in adults, addresses the multicultural issues in assessing communication disorders in adults, and offers an integrated assessment approach that includes the most desirable features of the traditional and several alternative approaches. Contains two chapters for each
