Aeolian Islands:

The Aeolian Islands Philip Ward, 1974 Discover Lipari Vulcano Salina Stromboli Filicudi Alicudi and Panarea Everyone has his own Italy the Rome of Bernini and the Colosseum the beaches of Rimini or Cattolica the slimy canals and aristocratic palaces of decaying Venice or the small towns encountered as if by sheer inspiration Anagni Bevagna Pienza Palestrina Monselice Erice My Italy is rocky Perugia of the windy winters magnificent Florence whose streets are paved with sculpture and something more than a handful of infinitesimal volcanic peaks rising like greeny brown icebergs from the Tyrrhenian sea north of Sicily This is not the Sicily one reads of in Pirandello or Verga the Catania of Capuana or Martoglio the Syracuse of Vittorini the Palermo recorded by Lampedusa and discovered again teeming and afraid by the saintly Danilo Dolci It is not the Sicily that Plato knew Civilization brought Lipari and her sisters some neolithic villages shipwrecks of course without number a great citadel a few nondescript churches and simple houses Otherwise the Aeolians are timeless Their scale is geological rather than historical and the spitting fiery Stromboli is their symbol With an unerring sense of the dramatic Jules Verne chose Stromboli for the climax to his *Journey to the Centre of the Earth* I have kept the dialogue to a minimum not because talk isn't important to an Aeolian not one I met would read or write rather than talk but because straightforward translations miss the range of modulation and intonation on which a Sicilian prides himself and because any reported conversation with Italians necessarily lacks the accompanying vocabulary and gesture and facial contortion If you haven't listened to a Sicilian argument I can't do it for you If you have you'll never forget it anyway and will easily imagine whatever I omit PHILIP WARD Part of the Oleander Classics series this 1973 title has been reproduced using the highest quality modern scanning technology in order to keep this and other important works from the Press's 50 year history from going out of print In this way the invaluable resources provided by books in the series remain available for general readers academics and other interested parties

Anatomy of an Orogen: The Apennines and Adjacent Mediterranean Basins F. Vai, I. Peter Martini, 2013-12-21 This is the first book in English reviewing and updating the geology of the whole Apennines one of the recent most uplifted mountains in the world The Apennines are the place from which Steno 1669 first stated the principles of geology The Apennines also represent amongst others the finding testing sites of processes and products like volcanic eruptions earthquakes olistostromes and m langes argille scagliose salinity crisis geothermal fluids thrust top basins and

turbidities first represented in a famous Leonardo's painting. As such, the Apennines are a testing and learning ground readily accessible and rich of any type of field data. A growing literature is available, most of which is not published in widely available journals. The objective of the book is to provide a synthesis of current data and ideas on the Apennines for the most part simply written and suitable for an international audience. However, sufficient details and in-depth analyses of the various complex settings have been presented to make this material useful to professional scholars and to students of senior university courses.

Island Songs Godfrey Baldacchino, 2011-12-08 Islands are concentrated instances of place in every sense of the term. As such, there are no better candidates for observing and critiquing the dynamics of globalization. Through the close analysis of musical performance and traditions, the scholarly contributors to *Island Songs* provide a global review of how island songs, their lyrics, and their singers engage with the challenges of modernity, migration, and social change, uncovering common patterns notwithstanding the diversity and local specificity of their subjects. In this musical exploration of the world of islands, a shared and deep sense of place is celebrated in song. This collection of essays is no less than a sonic narrative, an attempt to sing the inherent contradictions and paradoxical modalities of island lives today. Song lyrics, along with their accompanying music, can serve as a barometer of life and major cultural markers of change. *Island Songs* is a work of sonic anthropology that does more than probe song as a part of the sociocultural life on islands. It illuminates how song performs island life. Gathered here are 15 case study chapters on islands in the Caribbean, North Atlantic, Mediterranean, Baltic, and the South Pacific, all framed by four eclectic conceptual essay contributions. In *Island Songs*, islands are presented as distinct vantage points for observing the merger of the local and the global, as poignantly expressed through song. This book brings together the perspectives and experiences of sociologists, anthropologists, geographers, cultural studies specialists, folklorists, ethnomusicologists, singers, and musicians. *Island Songs* will interest not only ethnomusicologists but any and all scholars interested in the effects of globalization on traditional cultures.
