K. Byamugisha, 2013-06-05 Despite being heavily endowed with land and other natural resources Sub Saharan Africa has the highest poverty rate in the world A key to leveraging its land and natural resources to eradicate poverty is improving land governance the subject of this book centered on a ten point program to scale up land policy reforms and investments Land and Water Management in Southern Africa Calvin Nhira, Alfred Mapiki, Sello Patrick Rankhumise, 2008 The Southern African Development Community SADC and its Member States are making renewed efforts to revive agriculture in the region Given that much of it is water stressed appropriate and sustainable land and water management practices are vital to achieving this objective Recognising this SADC s Land and Water Management Applied Research and Training Programme has convened two scientific symposiums Held in Lilongwe Malawi in February 2006 the inaugural symposium brought together practitioners from 10 participating SADC countries to deliberate on land and water management for sustainable agriculture and discuss how the most recent research and development advances in land and water management might be made more relevant to policymakers as well as the region s small scale farmers The edited contributions to this first symposium appear in this volume The second symposium was held in Gaborone Botswana in February 2007 and brought together regional experts to discuss opportunities for improving water use and water use efficiency in agriculture in semi arid and arid areas The edited contributions to the second symposium appear in a companion volume entitled *Land and Water Management in Southern Africa Towards Better Water Use in Agriculture in Semi Arid and Arid Areas* AISA 2008 It is hoped that these two volumes will help to disseminate regional expertise on land and water management to a wider audience thus helping policy makers and others to strengthen the agricultural sector in the region and in so doing improve its food security and the wellbeing of its people In Darkest Africa; Or The Quest, Rescue, and Retreat of Emin, Governor of Equatoria Henry Morton Stanley, 1904 **The Future of Drylands** Cathy Lee, Thomas Schaaf, 2008-11-14 Drylands have been cradles to some of the world s greatest civilizations and contemporary dryland communities feature rich and unique cultures Dryland ecosystems support a surprising amount of biodiversity Desertification however is a significant land degradation problem in the arid semi arid and dry sub humid regions of the world Deterioration of soil and plant cover has adversely affected 70% of the world s drylands as a result of extended droughts as well as mismanagement of range and cultivated lands The situation is likely to worsen with high population growth rates and accompanying land use conflicts The contributions to *The Future of Drylands* an international scientific conference held under the leadership of UNESCO address these issues and offer practical solutions for combating desertification along with conserving and sustainably managing dryland ecosystems Major themes include the conservation of dryland biological and

cultural diversity and the human dryland interface This volume documents how our improved understanding of drylands provides insight into the health and future prospects of these precious ecosystems that should help ensure that dryland communities enjoy a sustainable future
