Cultivating Creative Collaboration in Student Virtual Teams in Higher Education: Design and Climate Nemiro, Jill E., 2025-07-16 Over the last twenty years creativity has been shown to be a critical element to contemporary organizations especially as global competition the need for innovation and technological advances have intensified The rise of technological advances has produced an increase in remote work and virtual teams especially within business settings to deal with global competition and the rise of non routine work However the COVID 19 pandemic generated an even greater increase in the utilization of remote work and virtual teams not only in business but in higher education as well and it appears that this trend is not going away Thus it is crucial to teach students how to work effectively in virtual teams to prepare them for their future careers Training current employees in virtual teaming skills is also necessary as more professionals are transitioning into remote or hybrid work

Cultivating Creative Collaboration in Student Virtual Teams in Higher Education: Design and Climate provides an in depth understanding of how to design academic courses and business training experiences that can offer employees and college level students hands on experiences to develop virtual teamwork skills It aims to nurture students professional development by enhancing their creativity while working in virtual teams and to assist faculty in designing and implementing effective virtual team learning experiences in their courses Covering topics such as intentional team culture information sharing and setting communication norms this book is an excellent resource for educational leaders educators instructional designers technology instructors human resource HR managers business leaders professionals researchers scholars academicians and more

Advances in Intelligent Networking and Collaborative Systems Leonard Barolli, Hiroaki Nishino, Hiroyoshi Miwa, 2019-08-14 This book presents the latest innovative research findings methods and development techniques related to intelligent social networks and collaborative systems intelligent networking systems mobile collaborative systems and secure intelligent cloud systems Offering both theoretical and practical perspectives it also reveals synergies among various paradigms in the multi disciplinary field of intelligent collaborative systems With the rapid development of the Internet we are experiencing a shift from the traditional sharing of information and applications as the main purpose of the Web to an emergent paradigm that places people at the very centre of networks making full use of their connections relations and collaboration Social networks also play a major role in the dynamics and structure of intelligent Web based networking and collaborative systems Virtual campuses communities and organizations strongly leverage intelligent networking and collaborative systems through a wide variety of formal and informal electronic relations such as business to business peer to peer and many types of online collaborative learning interactions including the emerging e

learning systems This has resulted in entangled systems that need to be managed efficiently and autonomously In addition while the latest powerful technologies based on grid and wireless infrastructures as well as cloud computing are currently greatly enhancing collaborative and networking applications they are also facing new challenges The principal purpose of the research and development community is to stimulate research that will lead to the creation of responsive environments for networking and in the long term the development of adaptive secure mobile and intuitive intelligent systems for collaborative work and learning

A Transformation Gap? Theo Farrell,Terriff Terry,Osinga Frans,2010-04-07 NATO member states are all undergoing some form of military transformation Despite a shared vision transformation has been primarily a US led process centered on the exploitation of new information technologies in combination with new concepts for networked organizations and effects based operations Simply put European states have been unable to match the level of US investment in new military technologies leading to the identification of a growing transformation gap between the US and the European allies This book assesses the extent and trajectory of military transformation across a range of European NATO member states setting their transformation progress against that of the US and examining the complex mix of factors driving military transformation in each country It reveals not only the nature and extent of the transatlantic gap but also identifies an enormous variation in the extent and pace of transformation among the European allies suggesting both technological and operational gaps within Europe
