Infrastructures of Reality: Metaverse Stories, Spaces, Bodies Chris Hesselbein, Paolo Bory, 2025-08-09 This open access book focuses on two dimensions of the development of the metaverse that are crucial to reality namely spatiality and embodiment Metaversal technologies are thought to fundamentally affect both our spaces and bodies which are two central aspects of the constitution of social reality Both spatiality and embodiment are core elements of world making that are being pulled into the ambit of metaversal projects On the one hand metaversal technologies are profoundly spatial in the sense that they render space in virtual form or overlay digital layers onto pre existing physical spaces On the other hand metaversal technologies are directly geared towards the body in that they not only seek to extend or expand our embodied senses and emplace our bodies in virtual spaces but they also seek to capture their behaviours and actions on a far more granular level This can create new opportunities in terms of work social

interaction and leisure but can also open our bodies up to new tech driven interventions and control Whether in the form of VR or AR such technologies not only reproduce space but also rely on making spaces more legible and open to automated interventions Taken together the metaversification of spaces and bodies gives rise to crucial questions about the goals and implications of metaversal developments by large technology companies and about the relationship between the developments of the metaverse and AI systems Drawing on our combined background and expertise in Science and Technology Studies and the History of Media and Communication we critically analyse the development of metaversal technologies and platforms by discussing a broad set of developments and examples from a wide range of technology and gaming companies Written in clear concise and accessible language and combining and applying novel theoretical frameworks and concepts to a currently emergent phenomenon this book will find a large audience not only within academic and professional circles but also in popular culture

The Metaverse Economy Arunkumar Krishnakumar,Theodora Lau,2023-08-03 WINNER 2024 International Book Awards Business Technology The Metaverse Economy equips fintech professionals with an in depth understanding of the emergent economic models in the Metaverse and across Web3 In this book fintech and metaverse experts Arun Krishnakumar and Theodora Lau help technology and financial services professionals prepare for the convergence of several technology paradigms Web3 non fungible tokens NFTs game and finance GameFi and the Metaverse The Metaverse Economy provides an overview of the types of economic models that companies can use to scale business in Web3 Offering balanced insight into the complex world of the Metaverse the book demystifies the technology and economic paradigms that have triggered the rise of the Metaverse The book also focuses on the convergence of these economic models into a unified system that competes directly with traditional frameworks The authors break down the new qualitative and quantitative attributes professionals must consider to capture the opportunities of the market The Metaverse Economy tackles popular questions many financial services professionals have about market shares value permanence the ownership economy and play to earn models Packed with case studies from some of the biggest brands in blockchain DeFi NFTs and gaming the book helps finance professionals understand the risks associated with the Metaverse and prepare for what lies ahead

Artificial Intelligence and Playable Media Eric Freedman,2022-09-02 This book introduces readers to artificial intelligence AI through the lens of playable media and explores the impact of such software on everyday life From video games to robotic companions to digital twins artificial intelligence drives large sectors of the culture industry where play media and machine learning coexist This book illustrates how playable media contribute to our sense of self while also harnessing our data tightening our bonds with computation and realigning play with the demands of network logic Author Eric Freedman examines a number of popular media forms from the Sony AIBO robotic dog video game developer Naughty Dog s Uncharted and The Last of Us franchises to Peloton s connected fitness equipment to lay bare the computational processes that undergird playable media and addresses the social cultural technological and economic

forces that continue to shape user centered experience and design The case studies are drawn from a number of related research fields including science and technology studies media studies and software studies This book is ideal for media studies students scholars and practitioners interested in understanding how applied artificial intelligence works in popular public and visual culture
