Biohackers Magazine , First impressions seem to always get the better of us Quick judgments about others ourselves and our communities never seem to cease making their presence known in our minds Psychologically these initial assumptions and impressions that our mind receives are tactics our mind uses as a means of survival sometimes aligning with our intuition to help us determine what or who is going to be helpful or harmful But we must be careful here

Our mind is equipped to handle countless sensations and thoughts and due to this we sometimes get so bogged down by this demanding busy world that we take the easy way out and make a judgment based solely on superficial knowledge without any deeper reflection or analysis The world is fast paced and although our mind does well to keep up it needs to be able to consciously recognize that our health both individual and as human beings is dependent on the strive to understand oneself and the other with empathy and compassion COVID 19 has shed a new spotlight on the increasing mental health crisis that is facing our world and I believe that one of the main causes is careless thinking that leads to quick assumptions to save oneself the time of research and contemplation Don t let others think for you Yes respect those with the authority to offer professional opinions but don t be a follower be a student and learn from every experience When your health seems to suffer don t assume the worst When someone comes at you the wrong way don t write them off as a heartless soul When you have a tough interaction with someone representing another community don t assume that everyone else is like that Instead look for the best in yourself others and the community There is the power behind the phrase Love thy neighbor When we treat every person that we come across as our neighbor we break down the prideful barriers that ABOUT DALLAS MCCLAIN Born in the USA Dallas is a passionate reader of theological and personal development books He is a devout Catholic Christian and enjoys time outdoors while being a tennis enthusiast He is the Chief Financial Officer and Editor of Biohackers Update Magazine and the co founder He holds a bachelor s degree in Biological Sciences as well as a TEFL level 5 certificate in teaching English He is currently living in Orlando Florida with his wife daughter and son where he enjoys writing sports and nature hikes in his free time Dallas can best be reached at his email dallas.biohackersupdate.com@gmail.com lead to alienation and instead open the gates to continued togetherness and participation in a loving community I think too often we as biohackers focus more on the physical side of things which is of course important but does not truly define what it means to be human The human person is a compositum of both mind and body Spiritual and Corporeal substance When biohacking ourselves let s remember to start with the intention of acting out of love for thyself of thy neighbor and of thy community There will always be disagreements between people but when we see the other person as our neighbor as another one of us so to speak we offer respect and extinguish any hatred and sinful intentions from the relationship thus creating a peaceful happier and more vibrant environment to foster a healthy mind that s prepared for whatever the onerous world throws at it

Biohackers Magazine Issue 11 Biohackers , The world and the humans share a special bond together The world is a place full of vibrant life unpredictable events and a sort of beautiful self sustaining chaos The Human being s journey on this Earth is one that is corporeal yet also deeply spiritual The world presents so many things into our lives that often we forget that we are more than just what invokes responses from our physical senses What separates man from every other creature is his ability to think rationally What man lacks in survival endowments such as long claws fur etc man makes up for in his ability to know Man can think and know that he thinks Man

can eat and know that he eats Man can speak and know that he speaks The human being is able to conquer and have dominion over the creatures and the world itself because of this unique ability to know rationally There are many different areas where the human being shows this separation of pure intellect One would be his tool making ability or homo Faber It is true that some monkeys can make tools but it is the only man that makes these tools not just as an extension of their bodily reach but as direct fruition of their thoughts Community Language Science Arts Religion Death and Culture are all elements that show man's rationality his intellect The intellect exists in the soul of man and animates the body through the influence on man's free will Too often we focus on the superficial parts of ourselves and get lost in the mainstream's constant influential assault about how we should be physical While of course we are composed of the body we must remember that it is the soul that also makes up our life and its health must also be taken into consideration in everything we do We can define a human being as a rational animal a composite of both body and soul Its soul is the subsistent element and its powers involve the knowing intellect and the will to do good With free will aiming toward good and knowledge aiming towards the truth the human being works towards becoming more beautiful in the sense of intentionality of culture Biohacking in its deepest sense must look beyond the temporal world of physiological and temporal matter and adhere to the health and the growth of the human soul We are all on this Earth together and as biohackers we have the mission of increasing our knowledge every single day to feed not only our bodies and brains but most importantly our souls When one chooses to take the time to explore such questions as who they are and how they act and where they are going and what is their purpose they increase their value as a person through this continual development Their soul becomes more of a master over their temporal body and they can live life with perhaps more peace and happiness because of their continued growth and development of their soul which acts through their body
